

## corpus

### programming languages

- qlb - ramsey nasser
- tampio - finnish-looking programming language
- goto++ - full parody
- linotte - “if you can read a book, you can read a program”
- dolittle - japanese programming language (using reverse word order, like japanese grammar)
- maude - meta language
- befunge - two-dimensional playfield
- aheui - korean version of befunge
- chicken - one word, also has the most beautiful white paper
- emmental - self-rewriteable programming language
- brainfuck - <3 (draws from false)
- malbolge - hell
- difficult - thing, and everything
- lolcode - l33t sp34k as turing-complete
- this=that - exclusively variable-based language (with some pretty examples in the documentation)
- klingon - klingon
- perl-klingon - perl klingon
- unicode-obfuscated language proposal - can not use ASCII characters
- qriollo - language based on a hispanic dialect (rioplatense)
- urduscript - also based on a dialect (urdish = urdu + english)
- APLBAONWSJAS - just one command
- light patterns - harvestworks + daniel temkin
- shakespeare - like tragedy
- intercal - parody, amusing documentation and dialects
- whitespace - whitespace with only, well, whitespace (goes with perl::bleach)
- ioke - recursive, modifying, serious language

- excel turing - computer in excel
- trumpsript - python in trump's america
- algol - with its dialects
- perl
- c++
- javascript
- racket
- python
- lisp
- java
- clojure
- go

## poems

- code poems
- coroutines
- git commit messages
- perl poetry
- algol 69 - noel arnaud - poetry written in algol in 1968 (!!)
- Code scares me – Jessica Loseby
- poem by nari - warnell
- source code poetry - contemporary contest (but it imposes rhyming which is weird)
- perl poetry
- perl poetry contest
- tutorial on writing code poems
- ./code –poems
- black perl - original perl poem
- code poetry slam at stanford
- rasta software - wtf really

## peripheral

- code city - metaphor for source code
- ching - example of creative man page
- perl poetry mode - assumptions that a word is going to define a subroutine eventually
- perl::bleach - turns perl source code into whitespace code

## others/misc

- everythingissomeone - object oriented night time stories
- if hemingway wrote javascript - with a repo and a blogpost
- i speak myself into an object - code book
- basic computer games - source code of basic computer games
- first screening: computer poems - kinetic poems from 1984, with the source code of the JS reimplementation
- generations - short stories generated with python code and distributed as book/pdf with source code
- what to do after you hit return - decorated source code from old times published by the people's computer company
- google groups discussions about perl poems
- hastac code critique forums
- writeup on code poetry slam
- exquisite code - doesn't seem to be so much related to source code
- why code is not poetry - with a response here
- blog post on code and poetry
